COLLECTION 2022 /

WHITE LABEL LIVING

Who are we?

An easy-going basic must-have collection, that forms the foundation of every interior. Products which follow trends in design, colour and material. Matching today's lifestyle and needs. Commercial designs which will be a favourite of many. The collection is always in stock, friendly priced and web sales proof. We offer our white label collection specially to customers who want to sell it under their own brand or brandless.

Sustainability

White Label Living is part of the Zuiver Group, a family of interior brands, driven by our desire to make spot-on interior products available to everyone. As a frontrunner in the furniture design field, we feel it's our responsibility to minimise our environmental and social footprint by exploring alternative materials and production methods. 'Spot on Responsibility' is our internal strategy that was introduced in 2019 in order to transform how furniture is made and (re)used. It outlines the actions we are taking to move our business, and the design industry as a whole, towards a more innovative and responsible future. We do this because resources are limited and for us, taking action on climate change and recognising human rights are non-negotiable. Every single product we design and sell has some connection to natural resources. We are ready to make new choices in order to treat our planet with the utmost respect and to minimise our company's social and environmental footprint.

Climate-friendly catalogue

Sustainability also applies to this White Label Living catalogue. Zuiver Group supports the climate initiative of the printing and media industries federations (bvdm) who offer their customers environment-friendly and climate-friendly print products. The Climate Neutral label guarantees climate neutrality, which means that we have calculated the carbon emissions inevitably generated in the process chain, and compensated its emission via recognized carbon offset projects. Projects, cofounded by the WWF too, such as: wind energy in Asia, reduction of smoke emissions and reforestation in Africa and landfill gas in South America.
