We craft furniture for every moment in life, just as we did when we started more than 30 years ago, and our belief is still the same. Things should be allowed to grow at their own pace. It's true of forests, relationships, as well as the crafting of our furniture.

Our head office and soul is in Småland, an area in the South of Sweden surrounded by lush forests and lakes. It is a region famous for its furniture craftsmanship and age-old traditions, ensuring one does the most out of what natural resources are available. Today, we can proudly say that our origins are shaping our future.

As one of Scandinavia's leading furniture companies, we take pride in our commitment to building high-quality, durable pieces that not only

look beautiful but also contribute to a sustainable future. Every piece of furniture we create should stand the test of time and leave a minimal environmental footprint. To achieve this, we carefully select and use only the finest materials, such as FSC®-certified wood and carefully selected fabrics and leathers, while working with like-minded suppliers and manufacturers wherever possible to reduce our carbon footprint. In addition, our production processes always strive to minimise waste and reduce our environmental impact.

We strive to be the company that not only craft stunning and comfortable sofas, but also aligns with the values of our customers when it comes to establishing long-term relationships and protecting the planet today and in the future.

# *Just as every customer is unique, so is each of our sofas.*

Just as every customer is unique, so is each of our sofas. At Furninova, we manufacture custom-made upholstered furniture for customers in over 35 countries around the world. Every piece of furniture leaving our factory is commissioned, made precisely to the customer's requirements. Like a tailored suit, our sofas are unique and personal, and we believe that ordering something very personal increases the lifespan of the product and, in the long run, bears a lesser climate impact.

We have a constant strive to refine and improve our manufacturing methods. Every improvement we can implement, however small or large, should achieve sustainable use of natural resources. To achieve this, we employ a high level of craftsmanship and more than 30 years of experience at every step of the process. Since around 250,000 units leave our factories each year, this makes a lot of sense to us and the environment. Our goal is to put sustainability at the forefront of our development processes and compose collections that reduce the environmental impact without compromising on the finish, quality, or design.

Our sofas' wooden parts are manufactured in-house to guarantee that each item meets our high-quality standards. To safeguard sustainable production, we are an FSC®-certified company, sourcing wood only from responsibly managed forests and producers. We believe in offering options, and no one knows your body better than you. Our sofas are built around having options, and we offer our furniture in various heights and comforts - each offering individual seating properties that adapt to your body's needs.

In the pre-upholstery department, we combine several different types of foam to add the essential support where it is needed and a luxurious softness where it is felt. Some materials, like memory foam, were developed by NASA, and some, like feathers, have been optimized through evolution. Each has its individual properties, but it is when combining them that we create something truly remarkable. While you may sense it, your body will certainly appreciate it. It's our job to make sure, so you don't have to. Furninova only works with materials we can safely say have been tested for harmful substances. The testing includes our foams, natural and synthetic down fillings, and ball fibers. Our fabrics and leathers adhere to the same rigorous standards as our fillings.

Our covers need to look exceptional. That is why we sew them by hand. Perfection requires time. Stitching a sofa cover in a fabric will take a skilled sewing machine operator around an hour and a half. Since different sewing machines and techniques are involved in the process for a leather sofa, the time to craft a leather cover is almost two hours. Marrying the cover to the body of the sofa is a specialised craft. Stretching the surface taught where it is needed and adding flexibility where it will be felt and experienced is something that takes a lot of skill, know-how - and of course, the right touch.

You can take great comfort in knowing that much thought has been placed behind every part of your sofa. Everything is there for a reason, and everything has a craftsman's touch. As a final finishing step, we always go beyond double-checking each sofa before it leaves the factory. We do this to ensure that your sofa will provide you with a sense of pride and satisfaction - a unique sensation you can only experience by taking delivery of something that has been skillfully made just for you.

## Vesta LC

Vesta is available as a loose cover model. The difference in looks compared to a Vesta with a fixed cover is insignificant. You can easily remove the loose cover. Maintaining the sofa by choosing a washable fabric keeps the sofa clean and pristine and extends its lifespan. Practical and environmentally friendly at the same time. You will do yourself and the environment a big favour. Should a misfortune occur, it is also cheaper to exchange just the cover instead of the entire sofa.

# Vida

Vida might at first glance have a simple contemporary appearance. Still, it features distinctive elements in the areas of both comfort and design. Vida has a deep seating depth and softly rounded wide armrests that are padded. In fact, the entire frame is padded with foam, and the armrests and seat covers are sewn into one single section, which is a subtle but quite luxurious detail.

Our new comfort, C4, with synthetic down makes the cushions more stable and rounder than conventional down-filled without losing the feel. The filling is also allergy-friendly, contains no animal products.

Vida is certified with the Nordic Swan Ecolabel - the Nordic region's largest independent ecolabel. Furninova's objective is to reduce the overall environmental impact of producing and consuming goods. The Svanen Ecolabel covers the entire product's life cycle to benefit people, the environment and the earth's resources.

The Nordic Swan has strict demands on chemicals. It's good for your health and the people who make the products, but it also means the world to our environment and our shared future.
