Transforming moods

That is what we want our lamps to do. The same feeling you have when you wake up to a sunny day, take the first sip of your morning coffee or when you have butterflies in your stomach. In life, we have all these magical experiences and memories that transform our moods and creates a feeling of well-being. That is the place we want to bring you to when you have one of our products in your surroundings.

We have had quality, design and a mood-changing feeling in focus since 1983. We have from this time been operating in the Swedish countryside in the village Svenljunga and are proud of our origin. We bring the world to our place with many different trends and a large spectrum of functions into our lamps. The foundation of our design is varied, modern, exciting and creative. Our innovative and trendsetting product range is mainly designed in-house.

With several lamp classics during the years, Globen Lighting has become one of Scandinavia's leading brands in lighting, and we are still growing. We believe that it is because of our feeling and passion for lamps. A lamp to us is something much more than a provider of light – in our world, a lamp forms and changes a state of mind. Something that surprises you every day. It is a central accent in the room and outdoor space that takes you to the place you want to be at right now. It transforms your mood.

SS23

SPRING SUMMER

2023 is the year for embracing colours in our homes. It's said that colours makes us happy and surely there is something about it that really changes the mood in a room.

In this collection we want to contribute to your frame of mind with a couple of lamp series in both sweet tones of pastel and more cheeky colours. We have also been working with shiny chromed surfaces, tone by tone, surfaces where matt meets shiny and porous materials such as travertine.

In this lookbook you'll find the highlights of SS23. To see the collection in its entirety, and our full product range, please visit globenlighting.com

IRIS *table*

The sweet table lamp Iris is like a piece of candy that lights up the room with its cheerful colour and expression.

COBBLER *pendant*

Our beloved series Cobbler has been expanded with a pendant in a brown.

BUDDY *table*

Buddy is the ideal friend in your home – when darkness falls it illuminates your presence with a downward and pleasant light.

CURVE *pendant*

Curve is a play with geometric shapes where the soft rounded arcs meet the sharp triangular lines of the shades. It's a perfect fit both over the dining room table and above the kitchen island.
